CIVIC COMMON SENSE.

A brief dispatch amnounced that the citizens of Los Angeles county, California, had voted four to one in favor of a bond issue of \$3,500,000 for the construction and improvement of highgeles. Both proposition carried by immense majorities. Neither was discussed at all as a political issue, but each carried on its merits as a business undertaking.

In all this country no city has made such rapid headway in population, wealth and all that goes to make life attractive. The climate alone would not count for such phenomenal growth, nor would the opportunities for making were unfit to control the destinies of money explain why so many men of the country. There has been a hurrywealth and position have chosen to make their homes in and around Los Oyster Bay, and the press groans with Angeles. The secret of its success is very simple. Every citizen is bent on do to John D. and the Standard Oil doing his utmost to promote the wel- company. Forty-seven or more cases fare of the city; the obstructionist, the captious critic find it extremely unpleasant there. The first question when any improvement is suggested is, will lected. This serves to distract the atit help Los Angeles? No one asks tention of the people of the west from whether a political party is back of a bond issue, or whether any one party such as the revision of the tariff, guarwill get an advantage from it. If it is good for Los Angeles, it goes through with very little opposition.

There are political parties and peanut politicians in the California town, just as there are everywhere; but they don't dare to oppose municipal benefits with politics. The result is that the whole community is united in a common purpose, and it is getting tremendous beneats from its enterprise, its Owens river water project is one of the largest undertakings of its kind in the world. MR. PEMBROKE'S POSITION.

To The Salt Lake Herald: Referring to the connection of my name and that of my son with "illegal voting"

on the bond issue.

There are two sides to every story. Ours will be presented at the proper time and place, and I would not encroach upon your space except to refute a statement of Harry Joseph's appearing in Tribune

columns Saturday as follows:
"As far as Herbert and Adrian Pemthe Bransford. They swore in their votes and that is the ground for the arrests."
Mr. Joseph said nothing whatever to us until long after voting; then he called me on the phone, stating that a number of the boys were down from the Fourth ward wanting him to get warrant for my arrest, and asked me, "what about it?" I made no statement to him. I voted before I was challenged, my son Adrian was not even challenged. Had our votes been objected to before voting we should probably have taken legal advice, (not Harry Joseph's in any case). As it is, the public and our friends know that we aspublic and our friends know that we assume a perfect right to vote upon a question of public finance, as indeed the direct official representatives of all corporate industrial and capitalistic enterprises that pay taxes should do upon such questions.

THROCKMORTON'S RETORT.

(Harper's Weekly.) Major Throckmorton, an innkeeper of Louisville in ante-belium days, was one of the most interesting characters that ever helped to make life worth living or history worth reading.

Here are some of his deeds: He elected Charles Dickens, the great English novel-

The Dickens affair is known to all and very offensive way to the major, who, ac-
